EDUCATION

The University of Texas at Dallas

B.S., Computer Science   August 2017-May 2021
B.S., Finance   August 2017-

TECHNICAL SKILLS

Languages: C++, Java, SQL, HTML, Javascript, Python
Tools: Excel, Word, PowerPoint, iMovie, Tableau, Logisim

OBJECTIVE: Motivated new graduate seeking a position to start career in a field related to computer science. Hoping to get an opportunity that can utilize my past experiences and knowledge along with giving me the opportunity to grow and learn.

BUSINESS EXPERIENCE

Oracle Corporation – Austin, Texas   June 2020 – August 2020
Intern

- Participated in the streamlined process of finding, breaking down and fixing issues and bugs on a long-term scale as part of the Continual Service Improvement team.
- Adjusted and tested Python code with APIs to streamline the information being passed to and from Jira.
- Updated and edited Confluence pages to clarify the processes that are involved in the act of extrapolating and using data for future references.

    Accomplishments: Found and broke down certain issues and bugs that were causing downtime on company services. Added to code to increase data fields to be received and used from Jira to Confluence.

Exeter Finance – Irving, Texas   May 2019 – August 2019
Intern

- Developed SQL code, project designs and various other supporting technical objects such as SSIS and ActiveBatch according to company requirements and coding process.
- Tested SQL scripts and other supporting technical objects through various database environments utilizing the DevOps process.
- Monitored company data environments to make sure the environments were running properly, and users were given the correct level of access.

    Accomplishments: Pushed hundreds of packages of code into production through a PowerShell process. Streamlined the process of receiving outside data into the internal database. Cleaned up accesses of the database.
